

INVESTING WITH AWARENESS

"No one succeeds without effort...Those who succeed owe their success to perseverance."

IWA Note:

Northern Graphite is Transforming, and The Energy is Electric!

"If there is any law which governs human existence it is the law of change. We forget it at our peril. When you change transportation, you change everything." - IWA

The surge in investor interest in Northern Graphite reflects the growing realization that government pledges to reach net zero emissions of greenhouse gases by the middle of this century will demand huge quantities of battery metals.

“It’s a gold rush on steroids,” is the new quote from industry experts. You’ve got the emergence of this green revolution where you have to build infrastructure from scratch. It’s not just China this time, it’s North America at the same time as China, and Europe at the same time as China. This supercharges the entire space.

Analysts at Goldman Sachs, JPMorgan and elsewhere have predicted that a shift to a green economy will create another “supercycle”, or period of rising commodity prices, similar to what occurred at the beginning of the 2000s, when China’s economic growth took off.

How do investors participate? Own quality names like Northern Graphite.

Here is the vision from the desk of Greg Bowes, CEO of Northern Graphite.

"This is simple. Northern Graphite has Industry leading assets, a great valuation and battery minerals will be the new commodity super cycle." - Greg Bowes

IWA continues to rate Northern Graphite as a strong buy.
